PATENT NO: KR20230140771A TITLE: METHOD FOR PROVIDING MULTILINGUAL MEDICAL-COUNSELLING SERVICE. DESCRIPTION: A MULTILINGUAL MEDICAL-COUNSELLING SERVICE THAT RECEIVES SPEECH INPUT FROM A USER, CONVERTS THE SPEECH INTO TEXT, PROCESSES THE MEDICAL REQUEST, TRANSLATES INFORMATION BETWEEN LANGUAGES, AND PROVIDES A MEDICAL COUNSELLING RESPONSE IN THE USER'S LANGUAGE. PATENT NO: US20230207097A1 TITLE: SYSTEMS AND METHODS OF USING ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING IN A TELEMEDICAL ENVIRONMENT TO PREDICT USER DISEASE STATES. DESCRIPTION: AN AI AND MACHINE-LEARNING BASED TELEMEDICAL SYSTEM THAT COLLECTS USER SYMPTOMS AND HEALTH - RELATED DATA AND USES AN ARTIFICIAL INTELLIGENCE ENGINE TO PREDICT POSSIBLE DISEASE STATES AND GENERATE TREATMENT PLANS. THE SYSTEM ALSO SUPPORTS USER AND HEALTHCARE-PROVIDER PORTALS AND CAN PROVIDE AI-GENERATED TREATMENT INFORMATION DURING TELEMEDICINE SESSIONS.

Novalty :

THE HEALTHCARE PORTAL SUGGESTED TO BE ENABLE BY AI, FEATURING MULTILINGUAL TELECONSULTATION, SMART MEDICINE TRACKING, AND GPS-BASED HOSPITAL NAVIGATION, IS AN INTEGRATED HEALTHCARE PLATFORM THAT LINKS TOGETHER PATIENTS, HEALTHCARE WORKERS, AND HEALTHCARE PROVIDERS VIA AN AI - POWERED MULTILINGUAL INTERFACE. IT ALLOWS A PATIENT TO COMMUNICATE BY WRITING, THE AI SYSTEM THEN RECOGNISES THE PATIENT'S HEALTHCARE NEED AND ARRANGES FOR A HEALTHCARE WORKER TO CARRY OUT THE TASK OF GATHERING PATIENT INFORMATION, ORGANISING A TELECONSULTATION, MONITORING THE MEDICATION SCHEDULE, AND COORDINATING HOSPITAL SERVICES. THE SYSTEM ALSO INCLUDES GPS-BASED HOSPITAL NAVIGATION, SO THAT BOTH THE HEALTHCARE WORKER AND THE PATIENT CAN LOCATE AND GET TO A SUITABLE HEALTHCARE FACILITY.

Inventive step :

THE PROPOSED INVENTION INTRODUCES AN AI-DRIVEN HEALTHCARE COORDINATION FRAMEWORK CONNECTING THE PATIENT, AI SYSTEM, HEALTHCARE WORKER, DOCTOR, AND HOSPITAL THROUGH A UNIFIED PLATFORM. THE HEALTHCARE WORKER ACTS AS AN INTERMEDIATE COORDINATION LAYER TO ASSIST PATIENTS WITH TELECONSULTATION, MEDICAL INFORMATION, MEDICATION MANAGEMENT, AND HOSPITAL SERVICES. THE AI SYSTEM PROCESSES THE PATIENT'S MULTILINGUAL TEXT REQUEST, IDENTIFIES THE HEALTHCARE REQUIREMENT, AND COORDINATES THE APPROPRIATE HEALTHCARE WORKER AND HEALTHCARE SERVICE. THE SYSTEM CAN ALSO USE AUTHORIZED PATIENT INFORMATION AND LOCATION DATA TO SUPPORT MEDICATION TRACKING, DOCTOR CONSULTATION, HOSPITAL SELECTION, AND GPS-BASED NAVIGATION**.** THE COMBINATION OF AI-DRIVEN MULTILINGUAL INTERACTION + HEALTHCARE WORKER COORDINATION + TELECONSULTATION + SMART MEDICATION TRACKING + GPS-BASED HOSPITAL NAVIGATION PROVIDES A CONTINUOUS, INTEGRATED HEALTHCARE WORKFLOW ON A SINGLE PLATFORM.

Claims:

[CLAIM 1] AN AI-ENABLED HEALTHCARE PORTAL SYSTEM THAT INCLUDES A TEXT-BASED MULTILINGUAL AI ASSISTANT, A HEALTHCARE WORKER COORDINATION MODULE, A TELECONSULTATION MODULE, A SMART MEDICINE TRACKING MODULE, AND A GPS-BASED HOSPITAL NAVIGATION MODULE FOR PROVIDING INTEGRATED HEALTHCARE SERVICES. [CLAIM 2] THE SYSTEM AS CLAIMED IN CLAIM 1, WHEREIN THE MULTILINGUAL AI ASSISTANT IS CONFIGURED TO RECEIVE TEXT INPUT, IDENTIFY THE PATIENT'S LANGUAGE AND HEALTHCARE REQUIREMENT, AND PROVIDE A RESPONSE IN THE SELECTED LANGUAGE. [CLAIM 3] THE SYSTEM AS CLAIMED IN CLAIM 1, WHEREIN THE HEALTHCARE WORKER COORDINATION MODULE ACTS AS AN INTERMEDIATE LINK BETWEEN THE PATIENT AND HEALTHCARE PROVIDER FOR COORDINATING PATIENT INFORMATION, TELECONSULTATION, MEDICATION, AND HEALTHCARE SERVICES. [CLAIM 4] THE SYSTEM AS CLAIMED IN CLAIM 1, WHEREIN THE SMART MEDICINE TRACKING MODULE IS CONFIGURED TO STORE MEDICINE NAME, DOSAGE, FREQUENCY, AND ADMINISTRATION TIME AND PROVIDE MEDICATION REMINDERS AND ADHERENCE TRACKING. [CLAIM 5] THE SYSTEM AS CLAIMED IN CLAIM 1, WHEREIN THE GPS-BASED HOSPITAL NAVIGATION MODULE IS CONFIGURED TO IDENTIFY A SUITABLE HOSPITAL OR MEDICAL DEPARTMENT BASED ON THE PATIENT'S HEALTHCARE REQUIREMENT AND LOCATION AND GENERATE A NAVIGATION ROUTE TO THE SELECTED HEALTHCARE FACILITY.
